

# Stereopticon Bureau

## Stereopticons Slides and Operators

W. M. Latham

Manager . . .

1295 Broadway

North-West Cor. 33d Street

New York City

# PROSPECTUS.

---

## OPERATORS

The need of a Headquarters where skilled and competent operators can be procured, at the shortest possible notice, has long been felt by Professional Lecturers, Readers, Scientists and others using stereopticon illustrations, and Mr. Latham would respectfully call the attention of such to the advantages of the above bureau.

We have available a staff of experienced and reliable operators, whom we place in charge of our instruments, and if necessary, can be ready at a notice of six hours, to illustrate anywhere in New York City or vicinity.

## SLIDES

We have for the convenience of our patrons a large number of views of almost every country, **which we furnish entirely free of charge.** The views are the property of Mr. Allan Latham, and constitute what is, probably, one of the finest private collections of lantern slides in existence. Many years have been consumed in their collection, each view having been selected for its individual merits, and in presenting them to lecturers and readers, we are confident that nowhere else can be obtained such perfect and well defined views as are contained in the following list.

A large number of the views of the different countries are beautifully colored by the best artists of Europe and of America. Many of the illustrations of the Recitals and Songs have been specially designed by prominent artists for Mr. Latham, and of the mechanical and dissolving effects, we can confidently assert that they are unrivalled by any collection in this country.

## TERMS

We will furnish any selection of views, dark reading lamp, electric enunciator, sheets, dissolving stereopticons, oxy-hydrogen gas, operator, etc., in fact relieving the lecturer of all responsibility save delivering the lecture, for the nominal sum of ten dollars, (\$10.00) per lecture and transportation of goods.

The above offer holds good to any city or town in the country that can be reached from New York in the day. Where an evening is lost in traveling, five dollars (\$5.00) additional will be charged. For New York City and vicinity the transportation is merely nominal.

## APPARATUS

We profess to own the most perfect instruments that science and skill of the present day can give, and their superiority over the generally accepted stereopticons lie in the following details:

FIRST.—In greater brilliancy of illumination, by the jets being made to burn from two to three feet more gas per hour than any jets hitherto manufactured.

SECOND.—Purity and accuracy in condensing lenses.

THIRD.—Having complete set of projecting lenses with each instrument, namely: 1-4, 1-2 and 4-4 size, so that it is always convenient to work from the rear of a gallery, no matter what the depth of the hall may be, thus avoiding the placing of lanterns in the midst of an audience and distracting their attention from the lecturer.

FOURTH.—Obtaining with the 4-4 lens the perfect and clear definition of the most minute and delicate objects, and throwing so flat a field that the entire picture is in perfect focus and we would call especial attention to the fact that we are the only public illustrators in this country that use on stereopticons for projection, the 2 A. Dallmeyer 4-4 lenses, costing \$148.00 each.

FIFTH.—By a new and perfected HIGH PRESSURE KEY, giving a marked improvement to dissolving effects.

SIXTH.—For communication between the lecturer and operator, we use the electric enunciator; also have dark reading lamps. Sheets ranging from six to twenty-four feet square.

### VIEWS TO ORDER

Those who wish views for special lectures, we have exceptional facilities for making slides from lecturer's own materials, such as photos, engravings, books, drawings, etc., at fifty cents each.

### REFERENCES

Below are a few names of the many prominent institutions, lecturers and scientists supplied with apparatus from this Bureau.
